

## Twin Floor Cleaners – A New Concept for Large Diameter Cleaning

*Twin 8 Jet Floor Cleaner with Wye*

In our continuing effort to bring new and sophisticated cleaning techniques to the storm and sewer cleaning markets, KEG is pleased to introduce the “Twin Six” and “Twin Eight” floor cleaning products. The “twins” are more of a new technique than a new product. Utilizing two six jet floor cleaners or two eight jet floor cleaners working in tandem (both with KEG patented fluid mechanics), plus a wye connector and other fittings, the twins offer the contractor or municipality crew the ability to clean large box culverts, arch pipe, or large diameter round pipes in a more efficient manner. The twin units run parallel in a large diameter pipe.

By using spacer bars and dual water feed lines, the twin units provide a uniform cleaning pattern over a wide diameter. With the addition of optional angle adapters, an even wider pattern of water can be created. The twins can be feed from one or multiple trucks, so the cleaning can continue over a longer period than conventional systems. For more information on the “twin” concept, contact your KEG Territory Manager.

### Advantages:

- ✓ Wide water pattern
- ✓ Dual water feed capabilities
- ✓ Complete package including all fittings

### Applications:

- ✓ Box Culverts
- ✓ Large Diameter Storm Lines
- ✓ Large Diameter Sanitary Lines
